

**9:00** **Discussion of planning ranges (All)**  
\*summary of PVA results, HPVA results, walk through decision rules for generating planning ranges for as many populations as we can

**12:00** **LUNCH BREAK**

**12:30** **TRT population viability criteria (All)**  
\*what will TRT population viability criteria ultimately look like?  
\*how will they relate to planning ranges for viability?  
\*how will A,P,D,SS criteria be expressed, what analyses will we use to support our recommendations?  
\*relation to ESU scenarios

**2:00** **BREAK**

**2:15** **Technical approaches to determining actions for recovery**  
\*what technical advice should/can the TRT provide in determining necessary and/or sufficient sets of actions for achieving population or ESU recovery?  
\*what analyses can/should the TRT do to support our recommendations?  
\*scenarios analyses

**3:30** **Monitoring and evaluation (Chris Jordan and Steve Katz)**  
\*How will work of NWFSC (and other) M&E efforts relate to work TRT needs to do?  
\*How will population viability criteria and ESU recovery goals affect monitoring?  
\*How can agendas of TRT, NWFSC M&E efforts (and others) be coordinated?

**4:30** **TRT business**

**5:00** **ADJOURN**
